

Author's Accepted Manuscript

Effect of physiochemical structure on energy absorption properties of plant fibers reinforced composites: dielectric, thermal insulation, and sound absorption properties

Shanping Zhang, Yan Li, Zhuoyuan Zheng

PII: S2452-2139(18)30099-8
DOI: <https://doi.org/10.1016/j.coco.2018.09.006>
Reference: COCO135

To appear in: *Composites Communications*

Received date: 19 June 2018
Revised date: 17 September 2018
Accepted date: 19 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of physiochemical structure on energy absorption properties of plant fibers reinforced composites: dielectric, thermal insulation, and sound absorption properties
