Designing function-oriented artificial nanomaterials and membranes via electrospinning and electrospraying techniques

Huixin Zong, Xin Xia, Yongri Liang, Songyuan Dai, Ahmed Alsaedi, Tasawar Hayat, Fantai Kong, Jia Hong Pan

PII: S0928-4931(17)33151-X
DOI: doi:[10.1016/j.msec.2017.11.007](https://doi.org/10.1016/j.msec.2017.11.007)
Reference: MSC 8306
To appear in: *Materials Science & Engineering C*
Received date: 30 September 2017
Revised date: 27 October 2017
Accepted date: 11 November 2017

The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Msc(2017), doi:[10.1016/j.msec.2017.11.007](https://doi.org/10.1016/j.msec.2017.11.007)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Designing function-oriented artificial nanomaterials and membranes
via electrospinning and electrospraying techniques**
