

Accepted Manuscript

A simple and green method for the production of nanostructured materials from poly (vinyl alcohol)/graphene quantum dots

Bruno V.M. Rodrigues, Tayna S. Cabral, Livia. F. Sgobbi, Jorge Deleuzuk, Rodrigo S. Pessoa, Eduardo R. Triboni, Thaisa B.F. de Moraes, Anderson O. Lobo

PII: S0254-0584(18)30695-3
DOI: 10.1016/j.matchemphys.2018.08.030
Reference: MAC 20873
To appear in: *Materials Chemistry and Physics*
Received Date: 25 May 2018
Accepted Date: 11 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
