Synthesis of new platinum(IV) complexes through breaking disulfide bond; crystal structure determination, electrochemical, photoluminescence and DNA interaction investigation

Maryam Noori, Bitā Shafaatian, Behrouz Notash

PII: S0020-1693(18)30914-9
DOI: <https://doi.org/10.1016/j.ica.2018.10.007>
Reference: ICA 18553

To appear in: *Inorganica Chimica Acta*

Received Date: 14 June 2018
Revised Date: 2 October 2018
Accepted Date: 3 October 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Synthesis of new platinum(IV) complexes through breaking disulfide bond;
crystal structure determination, electrochemical, photoluminescence and
DNA interaction investigation**
