Functional Analysis of Fanconi Anemia Mutations in China

Niu Li , Lixia Ding , Benshang Li , Jian Wang , Alan D. D'Andrea ,
Jing Chen

PII: S0301-472X(18)30635-0
DOI: [10.1016/j.exphem.2018.07.003](https://doi.org/10.1016/j.exphem.2018.07.003)
Reference: EXPHEM 3656

To appear in: *Experimental Hematology*

Received date: 31 May 2018
Revised date: 12 July 2018
Accepted date: 14 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Multiple molecular diagnostic tools applying for Fanconi anemia diagnosis
- Convenient functional study system to determine the pathogenicity of the variants
- The largest Chinese Fanconi anemia cohort to study the variant spectrum
- A comprehensive workflow to overcome the lacking of cytogenetic analysis
