Activate Metallic Copper as High-Capacity Cathode for Lithium-Ion Batteries via Nanocomposite Technology

Ying Huang, Wang Zhang, Sibai Li, Wei Luo, Zhimei Huang, Chun Fang, Mouyi Weng, Jiaxin Zheng, Feng Pan, Qingju Liu, Yunhui Huang

PII: S2211-2855(18)30716-X
DOI: <https://doi.org/10.1016/j.nanoen.2018.09.064>
Reference: NANOEN3069

To appear in: *Nano Energy*

Received date: 23 August 2018
Revised date: 21 September 2018
Accepted date: 30 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
