

## Accepted Manuscript

Biocompatible bacteria-derived vesicles show inherent antimicrobial activity

Eilien Schulz, Adriely Goes, Ronald Garcia, Fabian Panter, Marcus Koch, Rolf Müller, Kathrin Fuhrmann, Gregor Fuhrmann

PII: S0168-3659(18)30569-8  
DOI: doi:[10.1016/j.jconrel.2018.09.030](https://doi.org/10.1016/j.jconrel.2018.09.030)  
Reference: COREL 9482

To appear in: *Journal of Controlled Release*

Received date: 3 June 2018  
Revised date: 21 September 2018  
Accepted date: 30 September 2018

Please cite this article as: Eilien Schulz, Adriely Goes, Ronald Garcia, Fabian Panter, Marcus Koch, Rolf Müller, Kathrin Fuhrmann, Gregor Fuhrmann , Biocompatible bacteria-derived vesicles show inherent antimicrobial activity. *Corel* (2018), doi:[10.1016/j.jconrel.2018.09.030](https://doi.org/10.1016/j.jconrel.2018.09.030)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
