Iminium ion-enamine cascade reaction enables the asymmetric total syntheses of aspidosperma alkaloids vincadifformine and ervinceine

Ganesh Pandey, Jagadish Khamrai, Akash Mishra, Pulak Maity, Prasanna Kumara Chikkade

PII: S0040-4020(18)30989-X

DOI: [10.1016/j.tet.2018.08.025](https://doi.org/10.1016/j.tet.2018.08.025)

Reference: TET 29745

To appear in: *Tetrahedron*

Received Date: 6 July 2018

Revised Date: 16 August 2018

Accepted Date: 18 August 2018

Please cite this article as: Pandey G, Khamrai J, Mishra A, Maity P, Chikkade PK, Iminium ion-enamine cascade reaction enables the asymmetric total syntheses of aspidosperma alkaloids vincadifformine and ervinceine, *Tetrahedron* (2018), doi: <https://doi.org/10.1016/j.tet.2018.08.025>.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Graphical Abstract

To create your abstract, type over the instructions in the template box below.
Fonts or abstract dimensions should not be changed or altered.

Iminium ion-Enamine Cascade Reaction enables the Asymmetric Total Syntheses of *Aspidosperma* Alkaloids Vincadifformine and Ervinceine

Leave this area blank for abstract info.
