This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- This research shows a counter-intuitive benefit of decentralized procurement.
- The benefit occurs when a multi-division firm procures a durable good from a supplier.
- The benefit increases in product durability.
- Our results are shown to be robust by designing and implementing an iterative algorithm.
