

Accepted Manuscript

The quantum dark side of the optimal control theory

G. Mauricio Contreras, Juan Pablo Peña

PII: S0378-4371(18)31258-5
DOI: <https://doi.org/10.1016/j.physa.2018.09.134>
Reference: PHYSA 20195

To appear in: *Physica A*

Received date: 14 October 2017

Revised date: 19 May 2018

Please cite this article as: G.M. Contreras, J.P. Peña, The quantum dark side of the optimal control theory, *Physica A* (2018), <https://doi.org/10.1016/j.physa.2018.09.134>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Optimal Control theory.
- Pontryagin's equations and Hamilton-Jacobi-Bellman equations.
- Dirac's constrained systems method.
- Quantum Mechanics.
