Received date: 28 August 2017
Revised date: 1 June 2018
Accepted date: 4 July 2018

Please cite this article as: P. Baumann, D.S. Hochbaum, Y.T. Yang, A comparative study of the leading machine learning techniques and two new optimization algorithms, *European Journal of Operational Research* (2018), doi: 10.1016/j.ejor.2018.07.009

Highlights

- Comparison of fourteen machine learning algorithms on diverse collection of data sets
- First thorough analysis of combinatorial optimization algorithms for machine learning
- Combinatorial optimization algorithms achieve best and most robust performance
- All pairwise-similarities-based algorithms are top performers
