This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Energy-efficient home retrofits of Slovenian house owners are studied.
- Econometric models analyse partial and integral approach to retrofits.
- Drivers and barriers for the building retrofit decisions are determined.
- Various information sources influence energy-efficient retrofit decisions.
- Free public energy audits have failed to deliver the expected outcome.
