This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title Page

Title Collaboration between an Antimicrobial Stewardship Team and the Microbiology Laboratory can shorten time to directed antibiotic therapy for methicillin susceptible Staphylococcal bacteremia and to discontinuation of antibiotics for Coagulase-negative Staphylococcal contaminants

Running title Rapid results from micro lab need stewardship

Word Count Abstract: 150

Word Count Body: 3634
