

# Accepted Manuscript

Potential intended and unintended consequences of recommending initiation of colorectal cancer screening at age 45 years

Peter S. Liang, James Allison, Uri Ladabaum, Maria Elena Martinez, Caitlin C. Murphy, Robert E. Schoen, Aasma Shaukat, Jill Tinmouth, Samir Gupta

PII: S0016-5085(18)34884-4  
DOI: [10.1053/j.gastro.2018.08.019](https://doi.org/10.1053/j.gastro.2018.08.019)  
Reference: YGAST 62052

To appear in: *Gastroenterology*

Please cite this article as: Liang PS, Allison J, Ladabaum U, Martinez ME, Murphy CC, Schoen RE, Shaukat A, Tinmouth J, Gupta S, Potential intended and unintended consequences of recommending initiation of colorectal cancer screening at age 45 years, *Gastroenterology* (2018), doi: 10.1053/j.gastro.2018.08.019.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Potential intended and unintended consequences of recommending initiation of colorectal cancer screening at age 45 years.**

Word count: 1953
