Experimental analysis of super-knock occurrence based on a spark ignition engine with high compression ratio

Lei Zhou, Rui Kang, Haiqiao Wei, Dengquan Feng, Jianxiong Hua, Jiaying Pan, Rui Chen

PII: S0360-5442(18)31938-8

DOI: [10.1016/j.energy.2018.09.166](https://doi.org/10.1016/j.energy.2018.09.166)

Reference: EGY 13860

To appear in: *Energy*

Received Date: 8 June 2018

Revised Date: 8 September 2018

Accepted Date: 25 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Experimental analysis of super-knock occurrence based on a spark ignition engine with high compression ratio
