## **Accepted Manuscript**

Hydrothermal-assisted synthesis of a porous polyaniline/reduced graphene oxide composite as a high-performance electrode material for supercapacitors

Adam Moyseowicz, Grażyna Gryglewicz

PII: S1359-8368(18)31117-X

DOI: 10.1016/j.compositesb.2018.09.069

Reference: JCOMB 6039

To appear in: Composites Part B

Received Date: 10 April 2018 Revised Date: 20 July 2018

Accepted Date: 21 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
