Application of 3D printed ABS based conductive carbon black composite sensor in void fraction measurement

Jayanth N, Senthil P

PII: S1359-8368(18)32743-4

DOI: [10.1016/j.compositesb.2018.09.097](https://doi.org/10.1016/j.compositesb.2018.09.097)

Reference: JCOMB 6067

To appear in: *Composites Part B*

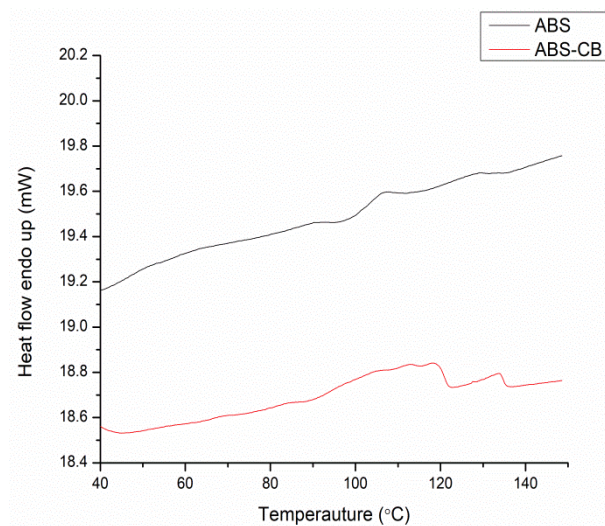

Received Date: 23 August 2018

Revised Date: 14 September 2018

Accepted Date: 28 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**ABS – CB conductive
3D printing filament**

Thermal Characterization

**3D Printing
of Sensors**

**Void Fraction
Measurement**
