This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- The survey of machine learning algorithms for WSNs from the period 2014 to March 2018
- Machine learning (ML) for WSNs with their advantages, features and limitations.
- A statistical survey of ML-based algorithms for WSNs.
- Reasons to choose a ML techniques to solve issues in WSNs.
- The survey proposes a discussion on open issues.
