Nitric oxide as an all-rounder for enhanced photodynamic therapy: Hypoxia relief, glutathione depletion and reactive nitrogen species generation

Yongyan Deng, Fan Jia, Shengyu Chen, Zhida Shen, Qiao Jin, Guosheng Fu, Jian Ji

PII: S0142-9612(18)30688-4

DOI: [10.1016/j.biomaterials.2018.09.043](https://doi.org/10.1016/j.biomaterials.2018.09.043)

Reference: JBMT 18914

To appear in: *Biomaterials*

Received Date: 6 July 2018

Revised Date: 28 September 2018

Accepted Date: 28 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Nitric Oxide as an All-Rounder for Enhanced Photodynamic Therapy: Hypoxia relief, Glutathione depletion and Reactive nitrogen species generation
