Spatial variability of saprolitic soil properties and relationship with joint set orientation of parent rock: Insights from cases in Hong Kong

W.F. Liu, Y.F. Leung

PII: S0013-7952(18)30926-8
DOI: doi:[10.1016/j.enggeo.2018.09.015](https://doi.org/10.1016/j.enggeo.2018.09.015)
Reference: ENGEO 4941
To appear in: *Engineering Geology*
Received date: 5 June 2018
Revised date: 11 September 2018
Accepted date: 14 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Spatial variability of saprolitic soil properties and relationship with joint
set orientation of parent rock: insights from cases in Hong Kong

W.F. Liu, Y.F. Leung*

*Department of Civil and Environmental Engineering, The Hong Kong Polytechnic University,
Hung Hom, Hong Kong*
