Statistical interpretation of spatially varying 2D geo-data from sparse measurements using Bayesian compressive sampling

Tengyuan Zhao, Yue Hu, Yu Wang

PII: S0013-7952(18)30649-5
DOI: doi:[10.1016/j.enggeo.2018.09.022](https://doi.org/10.1016/j.enggeo.2018.09.022)
Reference: ENGEO 4948
To appear in: *Engineering Geology*
Received date: 21 April 2018
Revised date: 20 September 2018
Accepted date: 20 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Statistical Interpretation of Spatially Varying 2D Geo-data from Sparse Measurements Using Bayesian Compressive Sampling
