Methodology for predicting reservoir breakdown pressure and fracture opening pressure in low-permeability reservoirs based on an in situ stress simulation

Jingshou Liu, Wenlong Ding, Yang Gu, Zikang Xiao, Junsheng Dai, Peng Dai, Xiaoshan Chen, Gang Zhao

PII: S0013-7952(18)30414-9
DOI: doi:[10.1016/j.enggeo.2018.09.010](https://doi.org/10.1016/j.enggeo.2018.09.010)
Reference: ENGEO 4936
To appear in: *Engineering Geology*
Received date: 14 March 2018
Revised date: 19 June 2018
Accepted date: 7 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Methodology for predicting reservoir breakdown pressure and fracture**
2 **opening pressure in low-permeability reservoirs based on an in situ stress**
3 **simulation**
