This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Prognostic Value of Global Longitudinal Strain in Heart Failure Patients Treated with Cardiac Resynchronization Therapy

Author: Mand J.H. Khidir, MD*, Rachid Abou, MD*, Dilek Yilmaz, MD, Nina Ajmone Marsan, MD, PhD, Victoria Delgado, MD, PhD, Jeroen J. Bax, MD, PhD

*MJHK and RA contributed equally to this article and share first author.

From: Heart Lung Center, Leiden University Medical Center, Leiden, The Netherlands

Short title: Prognostic value of GLS in CRT patients

Word count: 4878

Address for correspondence: Jeroen J. Bax, MD, PhD; Department of Cardiology, Heart Lung Center, Leiden University Medical Center; Postbus 9600, 2300 RC Leiden; Tel +31715262020; FAX +31715266809; e-mail: j.j.bax@lumc.nl

Disclosures:

The Department of Cardiology of the Leiden University Medical Center received research grants from Medtronic, Biotronik, Boston Scientific and Edwards Lifesciences. Victoria Delgado received speaking fees from Abbott Vascular. The remaining authors have nothing to disclose.
