Can Global Longitudinal Strain Predict Response to Cardiac Resynchronization Therapy?

John Gorcsan, III, MD, Nobuyuki Kagiya, MD, PhD

PII: S1547-5271(18)30562-9

DOI: [10.1016/j.hrthm.2018.05.029](https://doi.org/10.1016/j.hrthm.2018.05.029)

Reference: HRTM 7608

To appear in: *Heart Rhythm*

Received Date: 23 May 2018

Please cite this article as: Gorcsan III J, Kagiya N, Can Global Longitudinal Strain Predict Response to Cardiac Resynchronization Therapy?, *Heart Rhythm* (2018), doi: 10.1016/j.hrthm.2018.05.029.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Can Global Longitudinal Strain Predict Response to Cardiac Resynchronization Therapy?**

Short title: Strain in CRT
