Title: Non-pharmacological techniques for the extremes of the cough spectrum

Author: Arietta Spinou

PII: S1569-9048(17)30422-6
DOI: <https://doi.org/10.1016/j.resp.2018.03.006>
Reference: RESPNB 2941

To appear in: *Respiratory Physiology & Neurobiology*

Received date: 30-11-2017
Revised date: 5-3-2018
Accepted date: 9-3-2018

Please cite this article as: Spinou, Arietta, Non-pharmacological techniques for the extremes of the cough spectrum. *Respiratory Physiology and Neurobiology* <https://doi.org/10.1016/j.resp.2018.03.006>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title Non-pharmacological techniques for the extremes of the cough spectrum

Highlights

- Cough is a protective reflex, an airway clearance mechanism and a common respiratory disease symptom. Humans are able to partially suppress cough or perform it on demand.
