This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

AI-generated *in silico* data in patent applications

Peter J. Finnie

Gill Jennings & Every LLP, The Broadgate Tower, 20 Primrose Street, London, EC2A 2ES, UK

Corresponding author: Finnie, P.J. (peter.finnie@gje.com).

Keywords: Intellectual property; IP; repurposed drugs; artificial intelligence; AI.

Teaser: AI will play a crucial part in the identification of potential candidates for drug repurposing. How should existing patent laws be updated to cater for computer-assisted innovation?
