

## Accepted Manuscript

A method to quantify intracellular glycation in dermal fibroblasts using liquid chromatography coupled to fluorescence detection – Application to the selection of deglycation compounds of dermatological interest

Amandine André, Joanna Wdzieczak-Bakala, Alexis Kaatio Touré, Didier Stien, Véronique Eparvier

PII: S1570-0232(18)31289-3  
DOI: doi:[10.1016/j.jchromb.2018.09.034](https://doi.org/10.1016/j.jchromb.2018.09.034)  
Reference: CHROMB 21385

To appear in: *Journal of Chromatography B*

Received date: 21 August 2018  
Revised date: 26 September 2018  
Accepted date: 28 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
