

## Author's Accepted Manuscript

A novel electrochemical aptasensor based on nontarget-induced high accumulation of methylene blue on the surface of electrode for sensing of  $\alpha$ -synuclein oligomer

Seyed Mohammad Taghdisi, Noor Mohammad Danesh, Morteza Alinezhad Nameghi, Mohammad Ramezani, Mona Alibolandi, Mohammad Hassanzadeh-Khayat, Ahmad Sarreshtehdar Emrani, Khalil Abnous

PII: S0956-5663(18)30779-6  
DOI: <https://doi.org/10.1016/j.bios.2018.09.081>  
Reference: BIOS10821

To appear in: *Biosensors and Bioelectronic*

Received date: 22 July 2018  
Revised date: 14 September 2018  
Accepted date: 23 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
