Investigation on mechanical performances of grain boundaries in hexagonal boron nitride sheets

Qiuyue Ding , Ning Ding , Long Liu , Nan Li ,
Chi-Man Lawrence Wu

PII: S0020-7403(18)32041-1
DOI: <https://doi.org/10.1016/j.ijmecsci.2018.10.003>
Reference: MS 4559

To appear in: *International Journal of Mechanical Sciences*

Received date: 25 June 2018
Revised date: 28 September 2018
Accepted date: 2 October 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Systematically investigating the effect of GBs on the mechanical properties and failure behaviors of *h*-BN nanosheets.
- The effect of strain rate and temperature on the mechanical properties and failure behaviors of GBs have been studied.
- Explaining the fracture mechanism of GBs using MD and DFT methods.
