Received date: 8 April 2018  
Revised date: 13 September 2018  
Accepted date: 17 September 2018

Please cite this article as: Luis Gouveia, Markus Leitner, Mario Ruthmair, Layered graph approaches for combinatorial optimization problems, *Computers and Operations Research* (2018), doi: <https://doi.org/10.1016/j.cor.2018.09.007>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Detailed explanation and classification of layered graph modeling techniques
- Review of methods to solve the resulting large-scale, extended formulations
- Provide modeling guidelines and observations concerning the solution of layered graph formulations
- Suggestions for future research directions
