Edge-based Compression and Classification for Smart Healthcare Systems: Concept, Implementation and Evaluation

Alaa Awad Abdellatif, Ahmed Emam, Carla-Fabiana Chiasserini, Amr Mohamed, Ali Jaoua, Rabab Ward

PII: S0957-4174(18)30596-7  
DOI: <https://doi.org/10.1016/j.eswa.2018.09.019>  
Reference: ESWA 12207

To appear in: *Expert Systems With Applications*

Received date: 13 May 2018  
Revised date: 7 September 2018  
Accepted date: 8 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Handling large volumes of acquired data is challenging for remote monitoring.
- Edge classification and compression is a promising solution for smart health.
- Adopting data transmission based on patients state enables efficient monitoring.
- Leveraging edge computing increases energy efficiency and decreases latency.
