Atypical Functional Connectivity of Amygdala Related to Reduced Symptom Severity in Children with Autism

Inna Fishman, PhD, Annika C. Linke, PhD, Janice Hau, PhD, Ruth A. Carper, PhD, Ralph-Axel Müller, PhD

PII: S0890-8567(18)31225-5

DOI: [10.1016/j.jaac.2018.06.015](https://doi.org/10.1016/j.jaac.2018.06.015)

Reference: JAAC 2290

To appear in: *Journal of the American Academy of Child & Adolescent Psychiatry*

Received Date: 28 November 2017

Revised Date: 21 May 2018

Accepted Date: 9 June 2018

Please cite this article as: Fishman I, Linke AC, Hau J, Carper RA, Müller R-A, Atypical Functional Connectivity of Amygdala Related to Reduced Symptom Severity in Children with Autism, *Journal of the American Academy of Child & Adolescent Psychiatry* (2018), doi: 10.1016/j.jaac.2018.06.015.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Atypical Functional Connectivity of Amygdala Related to Reduced Symptom Severity in
Children with Autism

Axel Müller, PhD

Clinical Guidance
Supplemental Material

Accepted June 21, 2018

Drs. Fishman, Linke, Hau, Carper, and Müller are with San Diego State University, CA.

This work was supported by grants from the National Institutes of Health (K01 MH097972 to I.
Fishman and R01 MH081023 to R-A. Müller).

The authors are grateful to Chris Fong, MA, Anna Christina Macari, MA, Sangeeta Nair, MA, Weiqi
Zhao, MA, and Yangfeifei Gao, MA, of San Diego State University, for invaluable assistance with data
collection. The authors' strongest gratitude goes to the children and families who so generously dedicated
their time and effort to this research.

Disclosure: Drs. Fishman, Linke, Hau, Carper, and Müller report no biomedical financial interests or
potential conflicts of interest.
