This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Rethinking Lethality in Youth Suicide Attempts: First Suicide Attempt Outcomes in Youth Ages 10 to 24

RH = First Suicide Attempt Outcomes: 10-24 Years Old

Alastair J.S. McKean, MD, Chaitanya P. Pabbati, MD, Jennifer R. Geske, MS,  
J. Michael Bostwick, MD

Editorial

Drs. McKean and Bostwick and Ms. Geske are with the Mayo Clinic, Rochester, MN. Dr. Pabbati is with the University of California, San Diego.

Accepted June 21, 2018

Part of this study was presented at the Mayo Clinic School of Continuous Professional Development, Aeschi West, in Vail, CO, June 8-10, 2017 and Grand Rounds, Medical College of Wisconsin, in Milwaukee, WI, April 12, 2017.

Ms. Geske served as the statistical expert for this research.

The authors wish to thank Lori Solmonson, Dr. McKean's research secretary, for her generous and enthusiastic assistance in helping to prepare this manuscript for submission.

Disclosure: Dr. Bostwick has received funding from the National Institute on Aging (grant U01AG-45390; PI: Boeve) and has delivered non-industry-sponsored CME lectures. Drs. McKean and Pabbati and Ms. Geske report no biomedical financial interests or potential conflicts of interest.
