

Accepted Manuscript

Advancement in porous adsorbents for post-combustion CO₂ capture

Arindam Modak, Subhra Jana

PII: S1387-1811(18)30504-3

DOI: [10.1016/j.micromeso.2018.09.018](https://doi.org/10.1016/j.micromeso.2018.09.018)

Reference: MICMAT 9117

To appear in: *Microporous and Mesoporous Materials*

Received Date: 1 August 2018

Revised Date: 9 September 2018

Accepted Date: 18 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Table of Content

Advancement in porous adsorbents for post-combustion CO₂ capture

A comprehensive discussion on the development and prospect of several advanced porous materials for CO₂ capture and storage together with technical feasibility and efficacy was demonstrated.
