This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

MS 18-426

Revised 5-25-18

Importance of Early Insertion of Inferior Vena Cava Filters in Unstable Patients with
Acute Pulmonary Embolism

Paul D. Stein, MD¹, Fadi Matta, MD¹, Frank R. Lawrence, PhD², Mary J Hughes, DO¹

¹ Department of Osteopathic Medical Specialties, College of Osteopathic Medicine, Michigan State University, East Lansing, Michigan

² Center for Statistical Training Consulting, Michigan State University, East Lansing, Michigan

Funding: None

Pharmaceutical or industrial funds: None

Conflict of interest: None

Participation: All authors had access to the data and participated in preparation of the manuscript.

Article type: Clinical research study.

Running head: Vena Cava Filters

Key words: pulmonary embolism, venous thromboembolism, unstable patients, selection bias, immortal time bias.

Word count: Abstract: 222

Text, excluding abstract, references and tables: 2002
