This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TITLE: Not Your Typical Arizona Granuloma: A Case Report of Disseminated Histoplasmosis

Sara Sani DO,
Jawad Bilal MD,
Elly Varma MD,
Shubha Kollampare MD,
Dominick Sudano MD

Department of Internal Medicine, University of Arizona, Tucson, AZ

Article type: Diagnostic dilemma

Keywords: Disseminated histoplasmosis, Behcet's Disease, TNF- alpha inhibitor

Funding: None

Conflict of interest: None

All Authors had full access to data during design and drafting of this manuscript.

Authors Contribution:

SS: Conception and design, drafting of manuscript

JB: Conception and design, revising the article, final approval of manuscript

EV: Conception and design

SK: Conception and design

DS: Conception and design, final approval of manuscript

Word count: 1189
