

## Accepted Manuscript

Catabolic repression in early-diverging anaerobic fungi is partially mediated by natural antisense transcripts

Kevin V. Solomon, John K. Henske, Sean P. Gilmore, Anna Lipzen, Igor V. Grigoriev, Dawn Thompson, Michelle A. O'Malley

PII: S1087-1845(18)30119-1  
DOI: <https://doi.org/10.1016/j.fgb.2018.09.004>  
Reference: YFGBI 3154

To appear in: *Fungal Genetics and Biology*

Received Date: 11 July 2018  
Revised Date: 10 September 2018  
Accepted Date: 11 September 2018

Please cite this article as: Solomon, K.V., Henske, J.K., Gilmore, S.P., Lipzen, A., Grigoriev, I.V., Thompson, D., O'Malley, M.A., Catabolic repression in early-diverging anaerobic fungi is partially mediated by natural antisense transcripts, *Fungal Genetics and Biology* (2018), doi: <https://doi.org/10.1016/j.fgb.2018.09.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Catabolic repression in early-diverging anaerobic fungi is partially mediated by natural antisense transcripts**
