This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Highlights (for review)**

- SNAP increases food security by 24 percentage points among low security individuals
- SNAP decreases high insecurity by 23 percentage points among low security individuals
- Low security individuals are more likely to report unmet food needs
