This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Highlights (for review)**

- Global risk aversion is a significant determinant of international equity correlations
- The risk aversion effect is consistent across all emerging stock markets
- The risk aversion effect is robust to alternative uncertainty measures
- The results underscore the importance of non-cash flow shocks in contagion models
