To appear in: *Journal of Behavioral and Experimental Economics*

Received date: 24 May 2017  
Revised date: 12 September 2018  
Accepted date: 17 September 2018

Please cite this article as: Tomáš Miklánek, Information Asymmetry and Exposure Effects in Dictator Games, *Journal of Behavioral and Experimental Economics* (2018), doi: <https://doi.org/10.1016/j.socec.2018.09.010>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- A model describes interaction of information asymmetries and inequality aversion.
- Even a very small exposure significantly increases transfers to recipients.
- Beliefs about concealment of one's own actions are crucial for dictator's decisions.
