

## Accepted Manuscript

Title: Biocompatible graphene-based nanoagent with NIR and magnetism dual-responses for effective bacterial killing and removal

Authors: Fan Yang, Yiting Feng, Xin Fan, Man Zhang, Chen Wang, Weifeng Zhao, Changsheng Zhao

PII: S0927-7765(18)30681-7  
DOI: <https://doi.org/10.1016/j.colsurfb.2018.09.070>  
Reference: COLSUB 9673

To appear in: *Colloids and Surfaces B: Biointerfaces*

Received date: 20-6-2018  
Revised date: 18-9-2018  
Accepted date: 28-9-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# These authors contributed equally.

Graphical Abstract

Highlights:

- A facile mussel-inspired synthesis of the nanoagent with dual responsive property.
