Title: An Iterative Multi-Atlas Patch-Based Approach for Cortex Segmentation from Neonatal MRI

Author: Carlos Tor-Díez Nicolas Passat Isabelle Bloch
Sylvain Faisan Nathalie Bednarek François Rousseau

PII: S0895-6111(18)30195-2
DOI: <https://doi.org/doi:10.1016/j.compmedimag.2018.09.003>
Reference: CMIG 1590

To appear in: *Computerized Medical Imaging and Graphics*

Received date: 5-4-2018
Revised date: 10-8-2018
Accepted date: 13-9-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- A multi-atlas method is proposed for cortex segmentation from neonatal MRI.
- Patch-based paradigm and iterative optimization are used together for segmentation improvement.
- Experimental results emphasize the relevance of the approach, compared to the state of the art.
