This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

How Instructors Frame Students' Interactions with Educational Technologies Can Enhance or Reduce Learning with Multiple Representations

Sally P. W. Wu, Jainaba Corr, and Martina A. Rau

University of Wisconsin – Madison

Corresponding Author: Sally P. W. Wu, Department of Educational Psychology, University of Wisconsin-Madison, pwwu@wisc.edu, 847-544-8920, orcid: 0000-0003-0096-7898

Acknowledgements

The research reported here was supported by the National Science Foundation through Award #1611782 and the Institute of Education Sciences, U.S. Department of Education, through Award #R305B150003 to the University of Wisconsin-Madison. The opinions expressed are those of the authors and do not represent views of the U.S. Department of Education. This research was also supported by the UW-Madison Graduate School. We thank instructors Judith Burstyn, Etienne Garand, Ive Hermans, Judy Hines, and the teaching assistants who helped us implement the experiment. We also thank Hannah Bowman, Maggie Cram, and Haengjung Ye for their conceptual and technical support.
