This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running head : Insecure attachment in hoarding behaviors

### Highlights

- Insecure attachment (preoccupied and fearful) is linked to hoarding.
- Preoccupied and fearful attachments are depicted by a fear of loss and abandonment.
- Possession/accumulation could help insecure people to deal with these fears.
- Insecure attachment appears to be a vulnerability factor in hoarding.
