Selective conversion of carbon dioxide into methane with a 98% yield on an in situ formed Ni nanoparticle catalyst in water

Heng Zhong, Guodong Yao, Xin Cui, Peng Yan, Xiaoguang Wang, Fangming Jin

PII: S1385-8947(18)31879-5
DOI: <https://doi.org/10.1016/j.cej.2018.09.155>
Reference: CEJ 19994

To appear in: *Chemical Engineering Journal*

Received Date: 18 April 2018
Revised Date: 11 September 2018
Accepted Date: 21 September 2018

Please cite this article as: H. Zhong, G. Yao, X. Cui, P. Yan, X. Wang, F. Jin, Selective conversion of carbon dioxide into methane with a 98% yield on an in situ formed Ni nanoparticle catalyst in water, *Chemical Engineering Journal* (2018), doi: <https://doi.org/10.1016/j.cej.2018.09.155>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

For submission to *Chemical Engineering Journal* as **Original Article**

Selective conversion of carbon dioxide into methane with a 98% yield on an in situ formed Ni nanoparticle catalyst in water
