Seismic moment and recurrence: Microstructural and mineralogical characterization of rocks in carbonate fault zones and their potential for luminescence and ESR dating

Evangelos Tsakalos, Maria Kazantzaki, Aiming Lin, Yannis Bassiakos, Eleni Filippaki, Nishiwaki Takafumi

PII: S0191-8141(18)30401-2

DOI: [10.1016/j.jsg.2018.09.018](https://doi.org/10.1016/j.jsg.2018.09.018)

Reference: SG 3750

To appear in: *Journal of Structural Geology*

Received Date: 3 August 2018

Revised Date: 28 September 2018

Accepted Date: 28 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Seismic Moment and Recurrence: Microstructural and mineralogical characterization of rocks
in carbonate fault zones and their potential for luminescence and ESR dating
