This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Photo-regulation of rod precursor cell proliferation

Manuela Lahne\*, Samantha M. Piekos\*, John O'Neill, Kristin M. Ackerman and David R. Hyde.

\*both authors contributed equally to this work

Department of Biological Sciences, the Center for Stem Cells and Regenerative Medicine and the Center for Zebrafish Research, Galvin Life Sciences Building, University of Notre Dame, Notre Dame, IN 46556 USA

**Corresponding author:** David R. Hyde, Ph.D., Department of Biological Sciences, 027 Galvin Life Sciences Building, University of Notre Dame, Notre Dame, IN 46556. Telephone 574-631-8054. Fax: 574-631-7413. Email: [dhyde@nd.edu](mailto:dhyde@nd.edu).

**Number of pages: 28**

**Figures: 8**

**Abstract word count: 341**

**Introduction word count: 757**

**Discussion word count: 1553**

**Conflict of Interest:** The authors declare no competing financial interests.

**ACKNOWLEDGMENTS:** We thank the Freimann Life Sciences staff for the excellent zebrafish husbandry and the relentless help they provide. We also appreciate the members of the Hyde lab for thoughtful discussions and the support of William Archer and NDIIF. This study was supported by grants from the National Eye Institute of NIH to DRH (R01-EY018417 and R01-EY024519) and the Center for Zebrafish Research, University of Notre Dame, Notre Dame, IN.
