

## Accepted Manuscript

The organophosphorus pesticide dimethoate decreases cell viability and induces changes in different biochemical parameters of rat pancreatic stellate cells

Salomé Martínez-Morcillo, Marcos Pérez-López, Francisco Soler-Rodríguez, Antonio González

PII: S0887-2333(18)30568-X  
DOI: doi:[10.1016/j.tiv.2018.09.011](https://doi.org/10.1016/j.tiv.2018.09.011)  
Reference: TIV 4366

To appear in: *Toxicology in Vitro*

Received date: 15 December 2017  
Revised date: 15 September 2018  
Accepted date: 18 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**The organophosphorus pesticide dimethoate decreases cell viability and induces changes in different biochemical parameters of rat pancreatic stellate cells.**
