Comparative hepatic transcriptome analyses revealed possible pathogenic mechanisms of fasiglifam (TAK-875)-induced acute liver injury in mice

Yuya Urano, Shingo Oda, Koichi Tsuneyama, Tsuyoshi Yokoi

PII: S0009-2797(18)30819-6

DOI: [10.1016/j.cbi.2018.09.011](https://doi.org/10.1016/j.cbi.2018.09.011)

Reference: CBI 8412

To appear in: *Chemico-Biological Interactions*

Received Date: 23 June 2018

Revised Date: 16 August 2018

Accepted Date: 18 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Comparative hepatic transcriptome analyses revealed possible pathogenic mechanisms**  
2 **of fasiglifam (TAK-875)-induced acute liver injury in mice**
