Accepted Manuscript

Impacts of moisture, soil respiration, and agricultural practices on methanogenesis in upland soils as measured with stable isotope pool dilution

P.E. Brewer, F. Calderón, M. Vigil, J.C. von Fischer

PII: S0038-0717(18)30309-2

DOI: 10.1016/j.soilbio.2018.09.014

Reference: SBB 7281

To appear in: Soil Biology and Biochemistry

Received Date: 12 February 2018

Revised Date: 11 September 2018

Accepted Date: 13 September 2018

Please cite this article as: Brewer, P.E., Calderón, F., Vigil, M., von Fischer, J.C., Impacts of moisture, soil respiration, and agricultural practices on methanogenesis in upland soils as measured with stable isotope pool dilution, *Soil Biology and Biochemistry* (2018), doi: https://doi.org/10.1016/j.soilbio.2018.09.014.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
